## *Farona™* - All Natural Powders

*Fine Powders From All Natural Resources*

*Naturally Superior Additives™*

### *Farona™ - All Natural Powders*

is a line of extraordinarily fine powders derived from natural fibers such as cotton. The company's revolutionary production process has finally made it possible to reduce these natural fibers to a mean particle size of 1 - 12 microns, depending on specific customer application requirements.

The production process also gives these powders an exceptionally low coefficient of friction and eliminates their ability to absorb moisture. These combined features allow the *Farona™ - All Natural Powders* to be suitable additives in a very broad range of personal care and household products.

**REACT-NTI** recommends a starting point usage of 2% to 50% by weight.

# REACT-NTI

## *Farona™ - All Natural Powders*

*Fine Powders From All Natural Resources*

### *Properties*

- All Natural
- Low Odor
- Stable
- Low Coefficient of Friction (C.O.F)
- Doesn't affect viscosity
- Easy to formulate
- Non irritating
- Safety tested - Acute inhalation and toxicity, Mutagenicity, and RIPT (Repeated Insult Patch Test) results available.
- Rub and mar resistant

### *Product Range*

Farona™ I	Cotton Powder
Farona™ II	Wood Powder
Farona™ III	Starch Derived Powder

### *Chemical & Physical Data*

Appearance	Free Flowing Powder	
Color	White to Pale Yellow	
Odor	Farona™ I	Slight
	Farona™ II	None
	Farona™ III	None
Mean Particle Size	1-12 Microns	

### *Applications*

- Antiperspirants
- Baby and Body Powders
- Creams and Lotions
- Body Washes and Soaps
- Shampoos and Conditioners
- Makeups
- Household Powder Cleaners and Fresheners

### *INCI/CTFA Names*

Available upon request
